May, 2019

Dear Madam or Sir,

I would appreciate if you would consider my application and portfolio for the position required.

Please be informed that I have recently graduated with a XX average in the technical college at University of Texas with full stack developer technical degree in May, 2019. Hence, I am looking for a new career opportunity in a well-established organization where my education, background and personal skills will allow me the opportunity to excel and grow.

Although my back ground is mostly customer service based, I would like to now put my new education to use. My experience in frontend and backend development keeping me well versed in JAVA, cascading style sheet (CSS), Firebase database, bootstrap, foundations, AJAX, and JSON.

I am a hard worker and enjoy new challenges. I take my responsibilities seriously and I am a fast learner. I enjoy working with teams and when assigned a task will work alone or together to complete the assignment at hand.

I look forward to be granted a personal interview and I hope my qualifications will meet your organizations requirement.

I look forward to meeting you in person and working with your organization.

Yours Sincerely,

James Torres Jr.
